

Cutless® PGR Application Rates

Cutless QuickStop™

Liquid PGR for foliar application to landscape plants for quick regulation. Make QuickStop application no more than 1 week after trimming plants to shape. Product will start working in 1-2 weeks.

Cutless® 0.33% Granular

Granular PGR recommended for landscape plantings under 6' tall. Trim plants 2-4 weeks after application of Cutless G. Product must be watered-in with .5" of rain or irrigation for plant uptake and activation.

Cutless Shrub and Tree Sculptor™

Granular PGR recommended for shrubs and small trees over 6' tall. Trim plants as needed for 3-4 months after application of Cutless STS. Product must be watered in with .5" of rain or irrigation for plant uptake and activation.

Application Guidelines

- Apply to well-established plants with vigorous growth
- When considering the rate range, consider plant size, maturity and drought/moisture conditions and other plant stress conditions
- Not recommended for plants with irregular growth patterns, voids, or plants with minimal foliage
- Do not apply to annual bedding plants
- ALWAYS READ AND FOLLOW LABEL DIRECTIONS

Plant Species Specific Guidelines

- Bush Daisy and Goldmound duranta - Start at the low application rate
- Hibiscus and Roses - May damage open blooms

Plants	QuickStop	Granular PGRs
Abelia	5 - 7 oz/gal	Medium Rate Chart
